BANCO

Marine cabins

The BANCO company specialize in production of marine cabins for cruise ships, naval vessels and offshore installations such as hotels, hospitals etc.

Our cabins can be made according to our projects and documentations or customer specification, fabricated from the high quality materials.

Material used in production owns all required certificates for the sea market in order to ensure maximum quality.

BANCO is producing complete modules of accommodation and sanitary cabins.

Standard equipment for wet units such as toilet cabinet, light fixture, towel rails, folding benches and waste bins, are designed and produced in our company and already well known for their quality on the sea market.

For accommodation cabins BANCO manufactures a wide variety of painted or laminated furniture made from steel, aluminum or stainless steel, specifically created for use on-board ships. They are designed to meet the specific requirements of marine conditions such as non-combustibility, durability, easy handling and economy of space and weight.

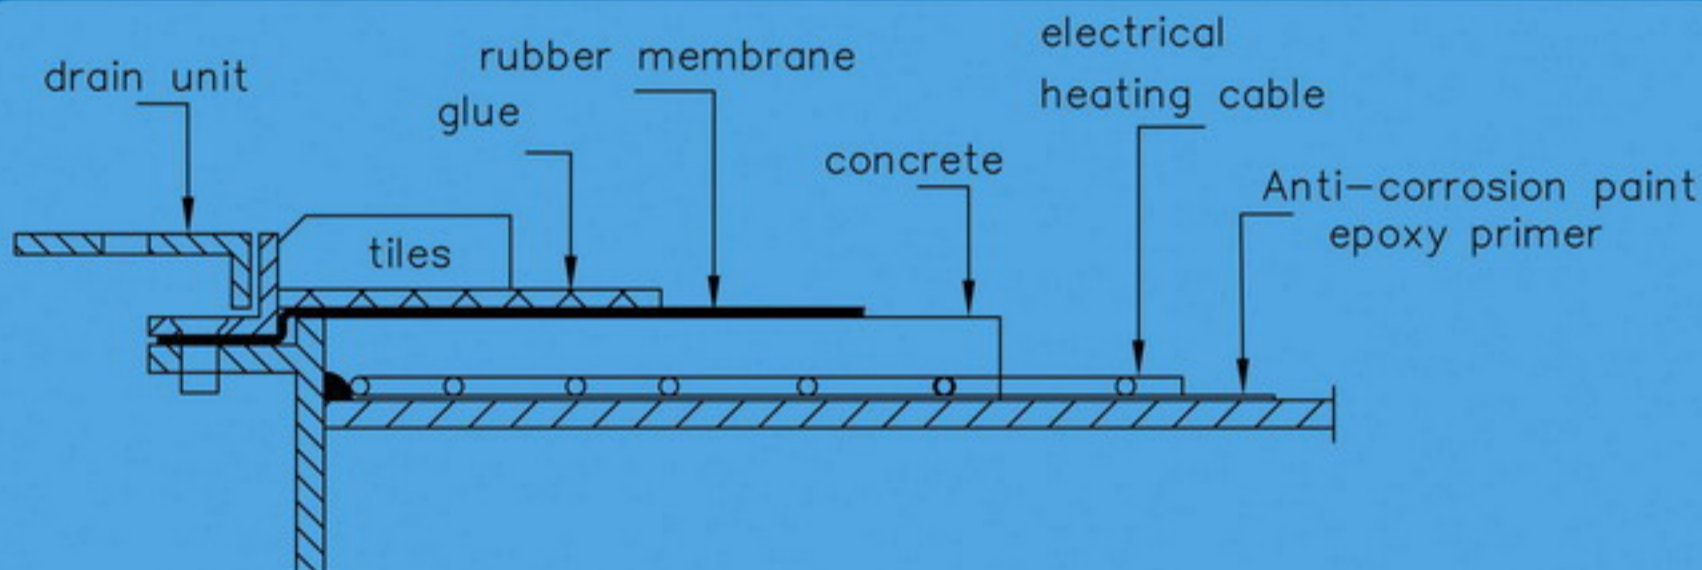

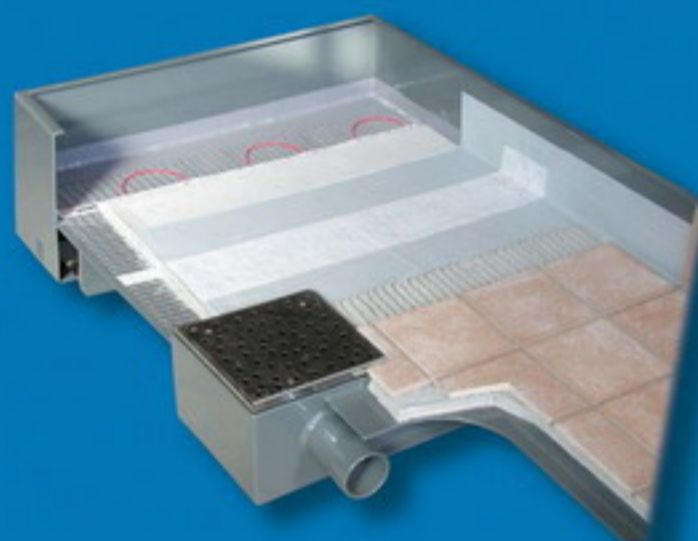

BANCO wet units are made from walls and ceilings, manufactured in sandwich construction.

The system is characterized by an easy and fast installation, a lightweight design and its high noise-reduction. The panels are made from galvanized steel sheets coated with decorative PVC foil. BANCO's sandwich panel consists of non-combustible materials with a core of mineral wool. All panel systems are supplied with a full range of fixing and edge profiles.

Our floor pans are mainly produced according to customer specifications and are made from steel, aluminum and stainless steel. They can be used in offshore and on-shore wet units.

Floor pans are powder coated with anti corrosion paint, from internal side primed with epoxy. Can be delivered with different types of draining system, of our production and design or customer specification. Electrical heating cable as an option are glued with adhesive to the rubber membrane and sealed with concrete.

Before putting the finishing every floor pans is water tight tested.
